William Jones

Web & Mobile developer Creative software engineer with practical experience in website and mobile app front-end development. Love to work with diverse talents in agile work environments. Meaningful and consistent communication is one of my foundation blocks and in my opinion is the most important indicator of success in this field. And my strengths are creativity and persistence.

Love failures, learning from failure and how to deal with failure next time. Thus, being optimistic, never give up to realize the dream.

Experience

12/2015 to 12/2019
